INDEX OF SUBJECTS VOLUME 24

A

Acrosome, -less spermatids, perinuclear cytoskeleton of 655
—, of strepsipteran spermatozoon 437
—, organization of, in developing mammalian sperm 1
Actin, F-, program of, in the follicular epithelium during oogenesis of the German cockroach, *Blattella germanica* 905
—, filaments associated with the basal Sertoli cell surface in the alligator and turtle 643
—, in ATP-depleted EL-4 ascites tumour cells 171
Adipose tissue, tyrosine-rich protein granules in 157
Adrenal cortex, rat, age-related changes in the morphology and function of the *Zona glomerulosa* of 835
Algal symbionts, entry of, into oocytes of the coral *Litophyton arboreum* 473
Androgen, in rat embryogenesis 483
Annelid, earthworm *Lumbricus terrestris*, parvalbumin-immunoreactive material in 715
Annelid, earthworm *Metaphire posthuma*, an ultrastructural study of clitellar epithelium of 745
Antigens, class II, in enterocytes of the mouse small intestine 221
Aortic intima, stellate cells of 689, 697
Ascidian, *Halocynthia*, initial stages of tunic morphogenesis in 121
Atomic absorption analysis, of bis (Tributyl-tin) oxide in rat submandibular gland 725

B

Baculovirus, recombinant, -infected larvae of the moth *Trichoplusia ni* 267
Baroreceptors, carotid, in the goat, ultrastructure of 681

C

Calcium, -binding proteins in chemoreceptors of *Xenopus laevis* 719
Carbohydrate residues, during the morphogenesis of the urogenital system in *Caretta caretta* 803
Carotid sinus, goat, ultrastructure of baroreceptors in 681
Cell cultures, from cryopreserved human lung tissue 455
Cell junction, in the gut of Protura 51
Cell migration, and pigment pattern of the frog 593
Cell wall, plant, liquid crystal order and turbulence in the planar twist of 335
Cellulose, of plant cell walls, liquid crystal order and turbulence in the planar twist of 335
Chemoreceptors, of *Xenopus laevis*, calcium-binding proteins in 719
Chemotaxis 355
Cholecystokinin, and fasting, the effect of, on normal and neoplastic tissue in the rat pancreas 625
Chorion, of *Manduca sexta* and *Sesamia nonagrioides*, fine structure of 735
Cilia, in branchial stigmatal cells of protochordates 229
Ciliate, filter feeding, digestion in raptorial and facultative forms of 443
Clara cell protein, the regulated expression of mRNA for, in the developing airways of the rat, as revealed by tissue *in situ* hybridization 461
Clitellum, earthworm, an ultrastructural study of 745
Cochlear proteins, a simple *in vitro* method for raising monoclonal antibodies to 613
Coelenterate, coral *Litophyton arboreum*, entry of algal symbionts into oocytes of 473
Collagen, fibroblast populated, lattice contraction 243
—, in tendon fibroblasts 511
—, of dogfish egg capsule, secretion and stabilization of 773
—, of rat calcaneal tendon 499
Collagen fibrils, membrane-bound intracytoplasmic, in tendon fibroblasts exposed to He:Ne laser beam 511
——, phagocytosis of, by periosteal fibroblasts in long bone explants 935
Collagen gels, effects of insulin, hydrocortisone and prolactin on cell morphology, growth and survival of mammary organoids from mid-pregnant mice cultured on 211
——, phenotypic responses of mouse mammary tumours and normal mammary epithelium cultured in: correlation with tumour type and progression 879
Collagen lattices, differences in cell division and thymidine incorporation with rat and primate fibroblasts in 843
Concanavalin A, effect of, on phagocytosis of collagen fibrils by periosteal fibroblasts in long bone explants 937
Confocal microscopy, of cytoskeletal F-actin 37
Connexin32, quantitative immunoassay of total cellular, during liver regeneration 61
Corpus luteum, bovine, interphase microtubule cyto-

skeleton of microvessel endothelial cell cultures derived from 347
Crustacea, amphipod, ultrastructural diversity in the pore canal systems of 417
—, crayfish, relationships between cell size and nuclear morphology in neurons of 191
—, crayfish *Procambarus paeninsulanus*, junctional complexes between the Sertoli cells in the testis of 379
Crustacea *Atya lanipes*, ultrastructural and mechanical properties of electrically inexcitable skeletal muscle fibers of the 525
Cryopreservation, of human lung tissue 455
Cuticle, of amphipod crustaceans, ultrastructural diversity in the pore canal systems of 417
—, the structure and growth rates of, in the stick-insect *Heteropteryx dilatata* 301
Cyclostome, brook lamprey *Lampetra lamottenii*, morphology of the liver of, before and during infection with the nematode, *Truttaedacnitis stelmioides* hepatocytes 575
Cytokine, production from freshly harvested human mononuclear cells attached to plastic beads 203
Cytoskeletal proteins, in ATP-depleted EL-4 ascites tumour cells, association of blebbing with assembly of 171
Cytoskeleton, and helicoidal extracellular matrices 315
—, in the epithelial cell line from *Chironomus tentans* 921
—, interphase microtubule, of microvessel endothelial cell cultures derived from bovine corpus luteum 347
—, of follicular epithelium 905
—, of Sertoli cells without germ cell and with germ cells, in the W/W^v mutant mouse 895
—, perinuclear, of acrosome-less spermatids in the blind sterile mutant mouse 655
—, ring-shaped organization of F-actin, associated with surface sensory receptors of *Schistosoma mansoni* 37

E

Ecdysteroid, -induced cellular differentiation in the epithelial cell line from *Chironomus tentans*, vesicle formation and 919
Echinoderm, ophiuroid, *Hermipholis elongata*, ultrastructure of the tube-foot of 111
Egg capsule, of the dogfish *Scyliorhinus canicula*, secretion and stabilization of the layers of 773
Elazmobranch, dogfish *Scyliorhinus canicula*, secretion and stabilizationof the layers of 773
Endocrine cells, and nerves in the stomach of the lizard *Podarcis hispanica* detected by immunocytochemistry 705
Endocytosis, receptor-mediated, of insulin by cultured endothelial cells 603
Endothelial cells, cultured, production of neutrophil-specific lipid chemoattractant activity 355
——, cultured, receptor-mediated endocytosis of insulin by 603
——, microvessel, the interphase microtubule cytoskeleton of 347
Enterocytes, of the mouse small intestine, quantitative regional variation in the expression of major histocompatibility class II antigens in 221
Epithelial cell line, from *Chironomus tentans*, vesicle formation and ecdysteroid-induced cellular differentiation in 919
Excitation-contraction coupling, in an electrically inexcitable skeletal muscle 525
Excretory system, histochemical characterisation of carbohydrate residues during the morphogenesis of the urogenital system in *Caretta caretta* 803
Exercise, and food restriction, effects of, on rat skeletal muscles 491
—, and food restriction, ultrastructural morphometry of matrical changes induced by, in the rat calcaneal tendon 499

F

F-actin, cytoskeletal, ring-shaped organization of, associated with surface sensory receptors of *Schistosoma mansoni*: a confocal and electron microscopic study 37
Fat-body, tyrosine-rich protein granules in 157
Fibroblast, -populated collagen lattice contraction 243
Fibroblast growth factor, basic, from anterior pituitary gonadotropes, is cellular disruption the mechanism of 791
Fibroblasts, periosteal, phagocytosis of collagen fibrils. Effect of concanavalin A 935
—, rat and primate, differences in cell division and thymidine incorporation, in collagen lattices 843
—, tendon, intracytoplasmic fibrils in 511
Fibronectin, as a substrate for melanophore migration 593
FMRF-amide neuropeptide 537
FMRFamide, immunocytochemical localization of, in the central nervous system and the kidney of *Helisoma duryi* (Mollusca): its possible antidiuretic role 179
Freeze-fracture, a simple *in vitro* method for raising monoclonal antibodies to cochlear proteins 613
——, ciliary specializations in branchial stigmatal cells of protochordates 229
——, fine structure of the chorion of *Manduca sexta* and *Sesamia nonagrioides* by SEM and 735
——, of cell junctions in the gut of Protura 51
——, of helicoidal extracellular matrices: comparison between plant and animal systems 315
——, of seminiferous tubules 75
——, reproductive system, the Sertoli cell membrane body in the skink 283
——, structural domains of the tight junctional intramembrane fibrils 291

G

Gallbladder, of the ovariectomized Syrian hamster, female sex steroid induced epithelial changes in the 869
Genital ducts, of the rat, absence of sex differences in size of 483
Glycogen distribution, in frog hepatocyte 17
Glycogen synthesis, metabolic zonation of, in rat liver after fasting and refeeding 31
Gold labelling, of RNA in virus-induced mitochondrial vesicles in the sheep blowfly *Lucilia cuprina* 411
Gonadotropes, anterior pituitary, is cellular disruption the mechanism of release of basic fibroblast growth factor from 791

H

Hair cells, a simple *in vitro* method for raising monoclonal antibodies to cochlear proteins 613
Helicoidal extracellular matrices, spatial and temporal regulations in: comparison between plant and animal systems 315
Helicoidal organisation, in growing plant cell walls 335
Helicoids, in the scales of the ocean sunfishes 263
Hepatocyte, frog, modifications induced by seasonal variations: a morphological and cytochemical study 17
—, rat, metabolic zonation in 31
Hybridization, tissue, the regulated expression of mRNA for Clara cell protein in the developing airways of the rat 461

I

Insect, a mosquito neuropeptide in a moth larva (*Helicoverpa zea*): relation to FMRF-amide immunoreactivity 537
—, *Chironomus* (Diptera: Nematocera), origin and development in 85
—, *Chironomus tentans*, vesicle formation and ecdysteroid-induced cellular differentiation in the epithelial cell line from 919
—, curculionid beetle *Sitophilus oryzae*, characteristics and development of the tyrosine-rich protein granules in the adipose tissue of 157
—, fine structure of the rectal pads in the desert locust *Schistocerca gregaria* with reference to the mechanism of water uptake 139
—, German cockroach, *Blattella germanica*, program of F-actin in the follicular epithelium during oogenesis of 905
—, gold labelling of RNA in virus-induced mitochondrial vesicles in the sheep blowfly *Lucilia cuprina* 411
—, localization of juvenile hormone esterase during development in normal and in recombinant baculovirus-infected larvae of the moth *Trichoplusia ni* 267
—, *Manduca sexta* and *Sesamia nonagrioides*, fine structure of the chorion of, by SEM and freeze-fracturing 735
—, morphological alterations accompanying the effect of peptaibiotics, α-aminoisobutyric acid-rich secondary metabolites of filamentous fungi, on *Culex pipiens* larvae 559
—, oöcyte degeneration in the queen honey bee after infection by *Nosema apis* 131
—, peculiarities of the organization of egg chambers in carabid ground beetles and their phylogenetic implications 397
—, peritrophic membrane structure and formation in the larva of a moth, *Heliothis* 751
—, the innervation of the closer muscle of the mesothoracic spiracle of the locust 547
—, the structure and growth rates of the cuticle of the stick-insect *Heteropteryx dilatata* 301
—, ultrastructure of the spermatozoon of *Elenchus japonicus* and its bearing on the phylogeny of Strepsiptera 437
Insulin, hydrocortisone and prolactin, effects of, on cell morphology, growth and survival of mammary organoids from mid-pregnant mice cultured on collagen gels 211
—, receptor-mediated endocytosis of, by cultured endothelial cells 603
Intercellular bridges, in polytrophic ovarioles, of carabid beetles 397
Intercellular junctions, quantitation of Sertoli cell-germ cell desmosomal, in relation to meiotic divisions in the male rat 565

J

Junctional complexes, between the Sertoli cells in the testis of the crayfish, *Procambarus paeninsulanus* 379
Junctions, gap, quantitative immunoassay of total cellular, during liver regeneration 61
—, gap, Sertoli cell-germ cell, quantitation of, in relation to meiotic divisions in the male rat 565
—, gap and septate, in the gut of Protura 51
—, intercellular, in rectal pads of the desert locust *Schistocerca gregaria* 139
—, tight, intramembrane fibrils in 291
Juvenile hormone, esterase, localization of, during development in normal and in recombinant baculovirus-infected larvae of the moth *Trichoplusia ni* 267

L

Laser biostimulation, of tendon fibroblasts 511
Liquid crystal, extracellular matrices, spatial and temporal regulations in 315
——, order and turbulence in the planar twist of the growing plant cell walls 335

Liver, of the brook lamprey *Lampetra lamottenii*, morphology of, before and during infection with the nematode, *Truttaedacnitis stelmioides* hepatocytes, sinusoids, and perisinusoidal cells 575
—, regeneration, quantitative immunoassay of total cellular gap junction protein connexin32 during 61
Lung, cultured fetal hamster, airway branching patterns and cytodifferentiation in 853
—, developing airways of, the regulated expression of mRNA for Clara cell protein in the developing, as revealed by tissue *in situ* hybridization 461
Lysosomes, and Golgi apparatus, changes of, during decidualization in mice 635

M

Mammary tumours, mouse, phenotypic responses of: correlation with tumour type and progression 879
Melanocyte-stimulating hormone, of the frog 593
Melanophores, of the frog 593
Membrane body, of Sertoli cell 283
Microcarrier beads, cytokine production from freshly harvested human mononuclear cells attached to 203
Microtubule cytoskeleton, interphase, of five different phenotypes of microvessel endothelial cell cultures derived from bovine corpus luteum 347
Microtubules, in cultured sensory ganglia 367
Midgut, in larva of a moth, peritrophic membrane structure and formation in 751
Mineralization, in the scales of the ocean sunfishes, *Mola mola* and *M. ramsayi* 263
Mitochondrial derivative, of strepsipteran spermatozoon 437
Mitochondrial vesicles, virus-induced, gold labelling of RNA in 411
Mollusc, freshwater snail *Planorbarius corneus*, intestinal cell types in: histochemical, immunocytochemical and ultrastructural observations 387
—, *Helisoma duryi*, immunocytochemical localization of FMRFamide in the central nervous system of 179
—, *Runcina*, structure of the female genital glands of the oviduct in the opisthobranch 95
Monoclonal antibodies, to cochlear proteins, a simple *in vitro* method for raising 613
Monocyte, cytokine production from freshly harvested human, attached to plastic beads 203
Muscle, conditions for isolation and culture of porcine myogenic 253
—, electrically inexcitable, of the crustacean *Atya lanipes*, ultrastructural and mechanical properties of 525
—, tergotrochanteral, in *Chironomus*, origin and development of 85
—, the innervation of the closer muscle of the mesothoracic spiracle of the locust 547
Muscles, rat skeletal, effects of exercise and food restriction on 491
Myogenesis, satellite cells and 253
Myogenesis of *Chironomus* flight muscle 85

N

Nacre, capacity of, to induce bone formation by human osteoblasts maintained *in vitro* 667
Nematode, *Truttaedacnitis stelmioides*, morphology of the liver of the brook lamprey *Lampetra lamottenii* before and during infection with 575
Nerve growth factor, and dibutyryl cyclic AMP, effects on cytoskeletal densities in cultured sensory ganglia 367
Nervous system, a mosquito neuropeptide in a moth larva (*Helicoverpa zea*): relation to FMRF-amide immunoreactivity 537
——, calcium-binding proteins in chemoreceptors of *Xenopus laevis* 719
——, endocrine cells and nerves in the stomach of the lizard *Podarcis hispanica* detected by immunocytochemistry 705
——, parvalbumin-immunoreactive material in the earthworm *Lumbricus terrestris* 715
——, relationships between cell size and nuclear morphology in crayfish neurons 191
——, synaptic contacts established by primary sensory fibers innervating the teeth of rats: an ultrastructural study of the pars interpolaris of the spinal trigeminal nucleus 821
——, the effects of nerve growth factor and dibutyryl cyclic AMP on cytoskeletal densities in cultured sensory ganglia 367
——, the innervation of the closer muscle of the mesothoracic spiracle of the locust 547
Neurofilaments, in cultured sensory ganglia 367
Neuropeptide, mosquito, in a moth larva: relation to FMRF-amide immunoreactivity 537
Nosema apis, oöcyte degeneration in the queen honey bee after infection by 131
Nuclear pore, distribution, in freeze-fracture replicas of seminiferous tubules isolated by transillumination 75
Nucleus, in crayfish neurons, relationships between cell size and morphology of 191
Nurse cells, in polytrophic ovarioles, of carabid beetles 397

O

Oocytes, entry of algal symbionts into 473
Osmoregulation, in the kidney of *Helisoma duryi* 179
Osteoblasts, maintained *in vitro*, demonstration of nacre to induce bone formation by 667
Osteoblasts human, demonstration of the capacity of nacre to induce bone formation by 667

P

Pancreas, rat, the effect of fasting and cholecystokinin stimulation on normal and neoplastic tissue in the 625

Parvalbumin, -immunoreactive material in the earthworm *Lumbricus terrestris* 715
Peptaibiotics, morphological alterations accompanying the effect of, on *Culex pipiens* larvae 559
Peptides, regulatory, in stomach of the lizard 705
Peritrophic membrane, structure and formation in the larva of a moth, *Heliothis* 751
Phagocytosis, of collagen fibrils by periosteal fibroblasts in long bone explants. Effect of concanavalin A 935
Pigment pattern, of the frog, role of the dermal tracts in 593
Pituitary, anterior, gonadotropes, is cellular disruption the mechanism of release of basic fibroblast growth factor from 791
—, rat, proliferative activity of cells of the intermediate lobe of, during the postnatal period 829
Pore canals, of crustacean cuticle, ultrastructural diversity in 417
Protein granules, tyrosine-rich, in the adipose tissue of the curculionid beetle *Sitophilus oryzae* 157
Protein transport, and organization of the developing mammalian sperm acrosome 1
Protochordates, ciliary specializations in branchial stigmatal cells of 229
Protozoa, digestion in a raptorial ciliate and in the facultative carnivorous form of a filter feeding ciliate 443
—, *Nosema apis*, oöcyte degeneration in the queen honey bee after infection by 131
Protura, cell junctions in the gut of 51

R

Receptors, sensory, cytoskeletal F-actin in 37
Reproductive system, a cytological and cytoskeletal comparison of Sertoli cells without germ cell and those with germ cells using the W/W^v mutant mouse 895
——, absence of sex differences in size of the genital ducts of the rat prior to embryonic day 15.5-16.0 483
——, actin filaments associated with the basal Sertoli cell surface in the alligator and turtle 643
——, changes of the Golgi apparatus and lysosomes during decidualization in mice 635
——, characterization of nuclear pore distribution in freeze-fracture replicas of seminiferous tubules isolated by transillumination 75
——, entry of algal symbionts into oocytes of the coral *Litophyton arboreum* 473
——, fine structure of the chorion of *Manduca sexta* and *Sesamia nonagrioides* as revealed by SEM and freeze-fracturing 735
——, histochemical characterisation of carbohydrate residues during the morphogenesis of the urogenital system in *Caretta caretta* 803
——, junctional complexes, between the Sertoli cells in the testis of the crayfish, *Procambarus paeninsulanus* 379
——, oöcyte degeneration in the queen honey bee after infection by *Nosema apis* 131
——, peculiarities of the organization of egg chambers in carabid ground beetles and their phylogenetic implications 397
——, perinuclear cytoskeleton of acrosome-less spermatids in the blind sterile mutant mouse 655
——, program of F-actin in the follicular epithelium during oogenesis of the German cockroach, *Blattella germanica* 905
——, proliferative activity of cells of the intermediate lobe of the rat pituitary during the postnatal period 829
——, protein transport, and organization of the developing mammalian sperm acrosome 1
——, quantitation of Sertoli cell-germ cell desmosome gap junctions in relation to meiotic divisions in the male rat 565
——, structure of the female genital glands of the oviduct in the opisthobranch mollusc, *Runcina* 95
——, ultrastructure of the spermatozoon of *Elenchus japonicus* and its bearing on the phylogeny of Strepsiptera 437
RNA, gold labelling of, in virus-induced mitochondrial vesicles 411

S

Satellite cells, conditions for isolation and culture of porcine myogenic 253
Scales, teleost, 'plywood' structure and mineralization in 263
Seminiferous tubules, characterization of nuclear pore distribution of 75
Sertoli cell, -germ cell, desmosome gap junctions in relation to meiotic divisions in the male rat, quantitation of 565
——, membrane body in the skink 283
——, surface, actin filaments associated with 643
Sertoli cells, junctional complexes between, in the crayfish testis 379
——, without germ cell and with germ cells in the W/W^v mutant mouse, a cytological and cytoskeletal comparison of 895
Sperm, developing mammalian, acrosome of 1
Spermatozoon, of *Elenchus japonicus* and its bearing on the phylogeny of Strepsiptera 437
Spiracle, mesothoracic, of the locust, innervation of the closer muscle of 547
Stellate cells, of aortic intima: human and rabbit 689, 697
Steroid, -induced epithelial changes in the gallbladder of the ovariectomized Syrian hamster 869
Submandibular gland, rat, the role of, in the excretion of bis (Tributyl-tin) oxide: electron microscopy, X-ray microanalysis and atomic absorption analysis 725
Synaptic contacts, established by primary sensory fibers innervating the teeth of rats: an ultrastructural study

of the pars interpolaris of the spinal trigeminal nucleus 821
Synaptogenesis, in tergotrochanteral muscle 85

T

Teeth, of rats, synaptic contacts established by primary sensory fibers innervating 821
Tendon, rat calcaneal, ultrastructural morphometry of matrical changes induced by exercise and food restriction in 499
Tight junctions, intramembrane fibrils of 291
Tissue culture, airway branching patterns and cytodifferentiation in cultured fetal hamster lung 853
——, association of blebbing with assembly of cytoskeletal proteins in ATP-depleted EL-4 ascites tumour cells 171
——, cell cultures from cryopreserved human lung tissue 455
——, conditions for isolation and culture of porcine myogenic satellite cells 253
——, effects of insulin, hydrocortisone and prolactin on cell morphology, growth and survival of mammary organoids from mid-pregnant mice cultured on collagen gels 211
——, free fatty acids and dialyzed serum alterations of fibroblast populated collagen lattice contraction 243
——, production of neutrophil-specific lipid chemoattractant activity by cultured endothelial cells: heterogeneity dependent on species, ligand, or endothelial cell site of origin 355
——, receptor-mediated endocytosis of insulin by cultured endothelial cells 603
——, stellate cells of aortic intima: I. Human and rabbit 689
——, stellate cells of aortic intima: II. Arborization of intimal cells in culture 697
——, the effects of nerve growth factor and dibutyryl cyclic AMP on cytoskeletal densities in cultured sensory ganglia 367
Tube-foot, of an ophiuroid echinoderm *Hermipholis elongata*, ultrastructure of 111
Tumour cells, association of blebbing with assembly of cytoskeletal proteins in ATP-depleted EL-4 ascites tumour cells 171
Tunic, in the ascidian *Halocynthia*, morphogenesis of 121
Tunicates, ciliary specializations in branchial stigmatal cells of 229

V

Vinculin, in ATP-depleted EL-4 ascites tumour cells 171

W

Water uptake, fine structure of the rectal pads in the desert locust *Schistocerca gregaria* with reference to the mechanism of 139
Wound healing, free fatty acids and dialyzed serum alterations of fibroblast populated collagen lattice contraction 243

X

X-ray microanalysis, of bis (Tributyl-tin) oxide in rat submandibular gland 725

Z

Zona glomerulosa, of the rat adrenal cortex, age-related changes in the morphology and function of 835

INDEX OF AUTHORS VOLUME 24

A

Abdel-Magied, E. M. Ultrastructure of carotid baroreceptors in the goat 681
Abrahamsohn, P. A. *see* Bijovsky and Abrahamsohn 635
Andreeva, E. R. *see* Rekhter, Andreeva, Andrianova, Mironov and Orekhov 689
Andreeva, E. R., Rekhter, M. D., Romanov, Yu. A., Antonova, G. M., Antonov, A. S., Mironov, A. A., and Orekhov, A. N. Stellate cells of aortic intima: II. Arborization of intimal cells in culture 697
Andrianova, I. V. *see* Rekhter, Andreeva, Andrianova, Mironov and Orekhov 689
Antonov, A. S. *see* Andreeva, Rekhter, Romanov, Antonova, Antonov, Mironov and Orekhov 697
Antonova, G. M. *see* Andreeva, Rekhter, Romanov, Antonova, Antonov, Mironov and Orekhov 697
Ashton, Mary-Lou *see* Saleuddin, Khan, Ashton and Griffond 179
